

TOP 203

DESCRIPTION

TOP 203 is a Tin One Pack Solid Heat Stabilizer for PVC and is designed to have a lubrication and processing control effect. It is suitable to replace lead (Pb) heat stabilizer and mix metal heat stabilizer because it can solve the problem in the rigid and opaque PVC control process with high output, low torque, and more efficiency.

PROPERTIES

Appearance	: White Powder
Physics form	: Fine powder
Melting point	: 110-140 C
Bulk density	: 0.65 ± 0.1

APPLICATION

- PVC Extrusion Pipe
- PVC Extrusion Sheet
- PVC Extrusion Roofing

STANDARD PACKAGE

Net weight: 20 kg/sack

HANDLING & STORAGE

TOP 203 is a tin base heat stabilizer, where in storing it, satisfactory ventilation should be guaranteed. When utilizing it, don't eat, drink, or smoke. Avoid breathing dust. Avoid contact with eyes. Wear protective equipment. Keep unprotected people absent.

Keep in a dry, cool, and well-ventilated place. Reseal containers immediately after use.

See Material Safety Data Sheet for safety and health data.
