Anti-Static Masterbatch

AST #310

▶ General

The anti-static masterbatch is produced by concentrating additives to reduce or eliminate static electricity, and the final product has a long-lasting antistatic effect.
This anti-static masterbatch was developed for LDPE and LLDPE and is designed to help the film feel open by reducing the film's stickiness. It is also designed to be suitable for blow film or cast film.

▶ Physical Properties

Article	Physical Propertiy	Remark
Melting Point	110~115℃	
Melting Flow Rate	9g/10min	2.16kg @ 190℃
Specific Gravity	0.92~0.93	
Moisture Content	below 0.3%	
Appearance	Natural color pallet	

▶ Recommended Dosage : 1~3%

▶ Lifetime & Storage

Store this masterbatch in a dry place away from direct sunlight, maintaining a temperature below 30
ensure usage within 2 months by following the First In, First Out (FIFO) principle.

▶ Safety

As this masterbatch is made of non-toxic materials.

▶ Packing : 25kg Bag, 1 ton/Pallet
