

## TECHNICAL DATA SHEET

### **GENERAL**

Product Name	:	PA 8334 P
Color	:	NATURAL
Product Description	:	PA 8334 P allows polypropylene to approach the look of high clarity plastics like polystyrene and polycarbonate
Application	:	Injection Molding & Thermoforming
Recommended Doses	:	As Required

### **CHEMICAL AND PHYSICAL PROPERTIES**

Base Resin	:	PP
Pellet Size	:	50 - 100 pcs/g
Bulk Density	:	0.80 - 1.50 g/cm <sup>3</sup>
Melt Flow Rate	:	20 ± 10 g/10min
Process Temp.	:	190°C - 230°C
Food Contact Approval	:	YES

### **KEY FEATURES**

1. Improved appearance
2. Better quality and consistency
3. Potential cost benefits

Data or recommendations are based on the extensive laboratory testing and / or application experience and trust to be a reliable indication of the expected results. However the data does not constitute as a guarantee, and is offered only as a guide to performance. Therefore, final approval and acceptance must be evaluated by the buyer.
